## SUMMARY

Full-stack developer with 4+ years of experience building scalable, high-quality web applications using **React**, **Next.js**, and **Node.js/TypeScript**. I love crafting user-friendly, accessible interfaces while taking ownership of the entire development lifecycle — from designing **REST APIs** and modeling data (**PostgreSQL/MongoDB**) to deploying applications in the cloud. I’m passionate about creating products that strike the right balance between excellent UX and solid engineering, and I constantly strive to improve performance, reliability, and developer experience through testing and observability. I thrive on building solutions that not only work but make a real impact.

## EXPERIENCE

|  |                                       |
|--|---------------------------------------|
| <b>Full-Stack Developer, Sahar SMS</b> <ul style="list-style-type: none"><li>Designed and implemented REST APIs using Express and TypeScript, covering routing, controllers, middleware, input validation, JWT-based authentication, and rate limiting for scalable and secure applications.</li><li>Modeled data and implemented data access with TypeORM: entities, relations, migrations, repositories, transactions; optimized queries and indexes in PostgreSQL.</li><li>Developed front end with Next.js and React: SSR, SSG, ISR, dynamic imports, code splitting, image optimization; data fetching with React Query or Next.js server actions.</li><li>Built a lightweight design system and reusable component library; documented components with Storybook for consistency and speed.</li><li>Documented and observed APIs with Swagger; added structured logging (Winston), and basic metrics and tracing.</li></ul>                              | 07/2025 – 09/2025<br>Tehran           |
| <b>Front-End Developer, Apanco</b> <ul style="list-style-type: none"><li>Teamed up with design and development teams to improve UX, and as a result, user satisfaction increased by more than 10%.</li><li>Worked closely with UX/UI designers to transform functional wireframes into web applications, which directly contributed to a 15% reduction of post-launch errors in user navigation reported.</li><li>Utilized Git and other version control systems to efficiently track project progress, facilitate collaboration, and maintain code integrity.</li><li>Incorporating better page strategies on web pages using React and Next.js, which led to faster and SEO-friendly web pages, increasing performance and enabling a 20% reduction in load time.</li><li>Utilized NextAuth.js in a Next.js project to implement secure authentication with JWT and refresh token support, enhancing session reliability and user data protection.</li></ul> | 03/2024 – 07/2025<br>Sari, Mazandaran |
| <b>Front-End Developer, Sepehr Academy</b> <ul style="list-style-type: none"><li>As a team member aspiring to enhance workflow efficiency by 25%, collaborated in a three-member team developing websites on the React framework.</li><li>Engineered visually appealing and fully responsive web pages with HTML, CSS, and JavaScript, aligning with client requirements and boosting user engagement.</li><li>Applied responsive and accessible designs to enhance compatibility across a wide range of devices and web browsers, ensuring a seamless user experience</li><li>Designed and refined user interfaces (UI) on Figma, leading to a 20% increase in customer satisfaction.</li><li>Developed a feature-rich admin panel to enhance UI interactions and streamline management processes, reducing content management time significantly.</li></ul>  | 01/2023 – 03/2024<br>Sari, Mazandaran |
