### SUMMARY

---

I am a front-end developer with over 3 years of experience in designing and developing single-page applications SPA using the React & Nextjs frameworks.

My goal is to create innovative user experiences, provide cutting-edge solutions to meet user needs, and elevate project performance. I am constantly seeking to learn new technologies and participate in impactful projects. I aspire to play a pivotal role in crafting tools and platforms that make the digital world better and more efficient.

### EXPERIENCE

---

#### Full-Stack Developer, *Sahar SMS*

07/2025 – 09/2025

Tehran

- Built REST APIs with Express and TypeScript: routing, controllers, middleware, validation, authentication (JWT or OAuth2), RBAC, and rate limiting.
- Modeled data and implemented data access with TypeORM: entities, relations, migrations, repositories, transactions; optimized queries and indexes in PostgreSQL or MySQL.
- Improved back-end performance with Redis for caching, sessions, and throttling; designed background jobs with simple queues.
- Developed front end with Next.js and React: SSR, SSG, ISR, dynamic imports, code splitting, image optimization; data fetching with React Query or Next.js server actions.
- Implemented UI and UX best practices: Figma-to-code, consistent form and error patterns, skeleton and loading states, micro-interactions, responsive layouts, dark and light themes, and accessibility (ARIA, keyboard navigation, contrast).
- Built a lightweight design system and reusable component library; documented components with Storybook for consistency and speed.
- Documented and observed APIs with OpenAPI or Swagger; added structured logging (Winston or Pino), error monitoring (Sentry), and basic metrics and tracing.
- Wrote automated tests: Jest and React Testing Library for UI; Supertest for API endpoints; ensured coverage on critical paths and regressions.

#### Front-End Developer, *Apanco*

03/2024 – 07/2025

Sari, Mazandaran

- Teamed up with design and development teams to improve UX, and as a result, user satisfaction increased by more than 10%.
- Worked closely with UX/UI designers to transform functional wireframes into web applications, which directly contributed to a 15% reduction of post-launch errors in user navigation reported.
- Utilized Git and other version control systems to efficiently track project progress, facilitate collaboration, and maintain code integrity.
- Built a small-scale real-time app with Socket.IO and Express.js to explore backend event handling and WebSocket integration.

- Incorporating better page strategies on web pages using React and Next.js, which led to faster and SEO-friendly web pages, increasing performance and enabling a 20% reduction in load time.
- Utilized NextAuth.js in a Next.js project to implement secure authentication with JWT and refresh token support, enhancing session reliability and user data protection.

**Front-End Developer, Sepehr Academy**

01/2023 – 03/2024

Sari, Mazandaran

- As a team member aspiring to enhance workflow efficiency by 25%, I collaborated in a three-member team developing websites on the React framework.
- Engineered visually appealing and fully responsive web pages with HTML, CSS, and JavaScript, aligning with client requirements and boosting user engagement.
- Applied responsive and accessible designs to enhance compatibility across a wide range of devices and web browsers, ensuring a seamless user experience.
- Designed and refined user interfaces UI on Figma, leading to a 20% increase in customer satisfaction.
- Developed a feature-rich admin panel to enhance UI interactions and streamline management processes, reducing content management time significantly.

SKILLS

- HTML
  - React
  - JavaScript
  - Express
  - NestJs
  - Axios
  - Yup
  - Formik
  - react-hook-form
  - NextAuth
  - TailwindCSS
  - Git
  - GitHub
  - Figma
  - App Routing
  - JWT
  - Responsive Design
  - Server Action
  - DBeaver
  - MongoDB
  - PostgreSQL
  - Swagger UI
- CSS
  - Nextjs
  - TypeScript
  - Socket.IO
  - Zod
  - Hero UI
  - Zustand
  - Shadcn/UI
  - React Router
  - React Query
  - Postman
  - Trello
  - Jira
  - NPM
  - Refresh Token
  - CSS Modules
  - Styled Component
  - Admin Panel
  - SPA
  - Mongoose
  - TypeORM

English	Persian
Advanced	Native

KEY ACHIEVEMENTS

- Improved Team Efficiency**

Boosted team productivity by 25% in a three-person team using React framework.
- Increased User Satisfaction**

Enhanced user satisfaction over 15% by collaborating with design teams for improved UX.
- Optimized Rendering Strategy**

Leveraged Next.js features like Server-Side Rendering (SSR) and API Routes to improve page performance and SEO, reducing initial load time by over 30%.

## STRENGTHS

---

### Performance Enhancement

Optimized page load by 20%.

### Authentication & Security

Integrated JWT, NextAuth, and refresh tokens to ensure secure user access

### User Experience Focus

Improved user satisfaction by 15%.

### UI Styling

Built responsive UIs with TailwindCSS and Styled Components following accessibility standards

## Projects

---

### Personal Web Site
