SUMMARY

Full-stack developer (React, Next.js, Node.js/TypeScript) with 3+ years of experience building **scalable, high-quality SPAs** and full-stack web apps. I design **performant, accessible UIs** and own **end-to-end delivery** — from **API design (REST)** and **data modeling (PostgreSQL/MongoDB)** to **CI/CD and cloud deployment**. I’m passionate about crafting products that balance **great UX with solid engineering**, while continuously improving **DX, performance, and reliability** through testing and observability.

EXPERIENCE

Full-Stack Developer, Sahar SMS	07/2025 – 09/2025 Tehran
<ul style="list-style-type: none">• Built REST APIs with Express and TypeScript: routing, controllers, middleware, validation, authentication (JWT) and rate limiting.• Modeled data and implemented data access with TypeORM: entities, relations, migrations, repositories, transactions; optimized queries and indexes in PostgreSQL or MySQL.• Improved back-end performance with Redis for caching, sessions, and throttling; designed background jobs with simple queues.• Developed front end with Next.js and React: SSR, SSG, ISR, dynamic imports, code splitting, image optimization; data fetching with React Query or Next.js server actions.• Built a lightweight design system and reusable component library; documented components with Storybook for consistency and speed.• Documented and observed APIs with Swagger; added structured logging (Winston), and basic metrics and tracing.	
Front-End Developer, Apanco	03/2024 – 07/2025 Sari, Mazandaran
<ul style="list-style-type: none">• Teamed up with design and development teams to improve UX, and as a result, user satisfaction increased by more than 10%.• Worked closely with UX/UI designers to transform functional wireframes into web applications, which directly contributed to a 15% reduction of post-launch errors in user navigation reported.• Utilized Git and other version control systems to efficiently track project progress, facilitate collaboration, and maintain code integrity.• Built a small-scale real-time app with Socket.IO and Express.js to explore backend event handling and WebSocket integration.• Incorporating better page strategies on web pages using React and Next.js, which led to faster and SEO-friendly web pages, increasing performance and enabling a 20% reduction in load time.• Utilized NextAuth.js in a Next.js project to implement secure authentication with JWT and refresh token support, enhancing session reliability and user data protection.	
Front-End Developer, Sepehr Academy	01/2023 – 03/2024 Sari, Mazandaran
<ul style="list-style-type: none">• As a team member aspiring to enhance workflow efficiency by 25%, collaborated in a three-member team developing websites on the React framework.• Engineered visually appealing and fully responsive web pages with HTML, CSS, and JavaScript, aligning with client requirements and boosting user engagement.• Applied responsive and accessible designs to enhance compatibility across a wide range of devices and web browsers, ensuring a seamless user experience	

- Designed and refined user interfaces (UI) on Figma, leading to a 20% increase in customer satisfaction.

SKILLS

- | | | |
|--------------------------------|--------------------|------------------------------|
| • HTML | • CSS | • React |
| • Next.js | • JavaScript | • TypeScript |
| • Express | • Socket.IO | • Nest.js |
| • Zod | • Axios | • HeroUI |
| • Yup | • Zustand | • Formik |
| • Shadcn/UI | • Redux | • react-hook-form |
| • NextAuth | • React Router | • TailwindCSS |
| • React Query | • GitHub | • Postman |
| • Trello | • Git | • App Routing |
| • Jira | • Figma | • NPM |
| • Responsive Design | • Refresh Token | • JWT |
| • CSS Modules | • DBeaver | • Styled Components |
| • Server Actions (Next.js 13+) | • Admin Panel | • PostgreSQL |
| • SPA | • MongoDB | • Mongoose |
| • TypeORM | • Swagger UI | • Material UI |
| • i18n | • pgAdmin 4 | • Context API |
| • Error & Loading UI Segments | • Route Middleware | • Server & Client Components |
