## SUMMARY

---

**Full-stack developer (React, Next.js, Node.js/TypeScript)** with 3+ years of experience building **scalable, high-quality SPAs** and full-stack web apps. I design **performant, accessible UIs** and own **end-to-end delivery** — from **API design (REST)** and **data modeling (PostgreSQL/MongoDB)** to **CI/CD and cloud deployment**. I’m passionate about crafting products that balance **great UX with solid engineering**, while continuously improving **DX, performance, and reliability** through testing and observability.

## EXPERIENCE

---

<b>Full-Stack Developer, Sahar SMS</b>	07/2025 – 09/2025 Tehran
<ul style="list-style-type: none"><li>Built REST APIs with Express and TypeScript: routing, controllers, middleware, validation, authentication (JWT) and rate limiting.</li><li>Modeled data and implemented data access with TypeORM: entities, relations, migrations, repositories, transactions; optimized queries and indexes in PostgreSQL or MySQL.</li><li>Improved back-end performance with Redis for caching, sessions, and throttling; designed background jobs with simple queues.</li><li>Developed front end with Next.js and React: SSR, SSG, ISR, dynamic imports, code splitting, image optimization; data fetching with React Query or Next.js server actions.</li><li>Built a lightweight design system and reusable component library; documented components with Storybook for consistency and speed.</li><li>Documented and observed APIs with Swagger; added structured logging (Winston), and basic metrics and tracing.</li></ul>	
<b>Front-End Developer, Apanco</b>	03/2024 – 07/2025 Sari, Mazandaran
<ul style="list-style-type: none"><li>Teamed up with design and development teams to improve UX, and as a result, user satisfaction increased by more than 10%.</li><li>Worked closely with UX/UI designers to transform functional wireframes into web applications, which directly contributed to a 15% reduction of post-launch errors in user navigation reported.</li><li>Utilized Git and other version control systems to efficiently track project progress, facilitate collaboration, and maintain code integrity.</li><li>Built a small-scale real-time app with Socket.IO and Express.js to explore backend event handling and WebSocket integration.</li><li>Incorporating better page strategies on web pages using React and Next.js, which led to faster and SEO-friendly web pages, increasing performance and enabling a 20% reduction in load time.</li><li>Utilized NextAuth.js in a Next.js project to implement secure authentication with JWT and refresh token support, enhancing session reliability and user data protection.</li></ul>	
<b>Front-End Developer, Sepehr Academy</b>	01/2023 – 03/2024 Sari, Mazandaran
<ul style="list-style-type: none"><li>As a team member aspiring to enhance workflow efficiency by 25%, collaborated in a three-member team developing websites on the React framework.</li><li>Engineered visually appealing and fully responsive web pages with HTML, CSS, and JavaScript, aligning with client requirements and boosting user engagement.</li><li>Applied responsive and accessible designs to enhance compatibility across a wide range of devices and web browsers, ensuring a seamless user experience</li></ul>	

- Designed and refined user interfaces (UI) on Figma, leading to a 20% increase in customer satisfaction.
