SUMMARY

Full-stack developer with 4+ years of experience building scalable, high-quality web applications using **React**, **Next.js**, and **Node.js/TypeScript**. I love crafting user-friendly, accessible interfaces while taking ownership of the entire development lifecycle — from designing **REST APIs** and modeling data **(PostgreSQL/MongoDB)** to deploying applications in the cloud. I'm passionate about creating products that strike the right balance between excellent UX and solid engineering, and I constantly strive to improve performance, reliability, and developer experience through testing and observability. I thrive on building solutions that not only work but make a real impact.

EXPERIENCE

Full-Stack Developer, *Sahar SMS*   07/2025 – 10/2025
                                                                                Tehran
- Designed and implemented REST APIs using Express and TypeScript, covering routing, controllers, middleware, input validation, JWT-based authentication, and rate limiting for scalable and secure applications.
- Modeled data and implemented data access with TypeORM: entities, relations, migrations, repositories, transactions; optimized queries and indexes in PostgreSQL.
- Developed front end with Next.js and React: SSR, SSG, ISR, dynamic imports, code splitting, image optimization; data fetching with React Query or Next.js server actions.
- Built a lightweight design system and reusable component library; documented components with Storybook for consistency and speed.
- Documented and observed APIs with Swagger; added structured logging (Winston), and basic metrics and tracing.

Front-End Developer, *Apanco*   03/2024 – 07/2025
                                                                                Sari, Mazandaran
- Teamed up with design and development teams to improve UX, and as a result, user satisfaction increased by more than 10%.
- Worked closely with UX/UI designers to transform functional wireframes into web applications, which directly contributed to a 15% reduction of post-launch errors in user navigation reported.
- Utilized Git and other version control systems to efficiently track project progress, facilitate collaboration, and maintain code integrity.
- Incorporating better page strategies on web pages using React and Next.js, which led to faster and SEO-friendly web pages, increasing performance and enabling a 20% reduction in load time.
- Utilized NextAuth.js in a Next.js project to implement secure authentication with JWT and refresh token support, enhancing session reliability and user data protection.

Front-End Developer, *Sepehr Academy*   01/2023 – 03/2024
                                                                                Sari, Mazandaran
- As a team member aspiring to enhance workflow efficiency by 25%, collaborated in a three-member team developing websites on the React framework.
- Engineered visually appealing and fully responsive web pages with HTML, CSS, and JavaScript, aligning with client requirements and boosting user engagement.
- Applied responsive and accessible designs to enhance compatibility across a wide range of devices and web browsers, ensuring a seamless user experience
- Designed and refined user interfaces (UI) on Figma, leading to a 20% increase in customer satisfaction.

- Developed a feature-rich admin panel to enhance UI interactions and streamline management processes, reducing content management time significantly.

SKILLS

- HTML
- Next.js
- Express
- Zod
- Code Splitting
- RESTful API Design
- Redux
- React Router
- GitHub
- Git
- Figma
- Yarn
- JWT
- Styled Components
- PostgreSQL
- Mongoose
- Material UI
- Context API
- Server & Client Components
- CSS
- JavaScript
- Socket.IO
- Axios
- Yup
- Formik
- react-hook-form
- TailwindCSS
- Postman
- App Routing
- NPM
- Responsive Design
- CSS Modules
- Server Actions (Next.js 13+)
- SPA
- TypeORM
- i18n
- Error & Loading UI Segments
- Managing toast notifications
- React
- TypeScript
- Nest.js
- HeroUI
- Zustand
- Shadcn/UI
- NextAuth
- React Query
- Trello
- Jira
- PNPM
- Refresh Token
- DBeaver
- Admin Panel
- MongoDB
- Swagger UI
- pgAdmin 4
- Route Middleware
