SUMMARY

Experienced in building scalable web applications with React, Next.js, and Node.js/TypeScript. Skilled in REST & GraphQL API design, database modeling (PostgreSQL, MongoDB), and cloud deployment. Passionate about accessible, high-performance UIs, improving developer experience, and delivering products that balance great UX with robust engineering.

EXPERIENCE

Sahar SMS
Full-Stack Developer

07/2025 – 10/2025
Tehran

- Built secure REST APIs with Node.js/TypeScript using JWT, RBAC, middleware, and rate limiting, and optimized PostgreSQL schemas with TypeORM (relations, indexes, migrations).
- Improved backend performance with Redis caching, session storage, and background job queues.
- Developed fast, SEO-friendly Next.js/React applications with SSR, SSG, ISR, dynamic imports, and code-splitting.
- Delivered responsive, accessible UIs from Figma and created reusable component libraries documented in Storybook.

Hexorix
Back-End Developer

03/2025 – 06/2025
Remote

- Built scalable backend services using Express.js, NestJS, and TypeScript, following clean architecture and modular patterns.
- Designed optimized PostgreSQL/MongoDB databases with TypeORM and Mongoose to improve performance and data consistency.
- Developed secure REST/GraphQL APIs with JWT, RBAC, validation, plus Redis-based caching, sessions, and rate limiting.
- Improved reliability with Jest tests, documented APIs with Swagger, and containerized services using Docker for smoother CI/CD.

Apanco
Front-End Developer

09/2023 – 03/2025
Sari, Mazandaran

- Converted UX/UI wireframes into production-ready React, TypeScript, and Next.js applications, reducing post-launch issues and optimizing performance.
- Developed and integrated scalable RESTful APIs with Express.js and TypeScript, implementing secure authentication with JWT and NextAuth.js.
- Applied Git workflows and CI/CD pipelines to maintain clean code and streamline releases, collaborating with backend engineers to optimize API contracts and data flow.
- Optimized React and Next.js apps through dynamic imports, image optimization, lazy loading, and monitored performance with Chrome DevTools and Lighthouse for better UX and SEO.

Sepehr Academy
Front-End Developer

03/2022 – 09/2023
Sari, Mazandaran

- Collaborated in a 3-member Agile team to build scalable, responsive React applications with modular, reusable components, improving development efficiency.
- Delivered pixel-perfect, accessible UIs using HTML, CSS, Flexbox/Grid, and modern JavaScript, translating Figma wireframes into production-ready React/TypeScript interfaces.
- Built and maintained a scalable admin dashboard with React, Context API, and Material UI, integrating RESTful APIs using React Query, Axios, and Postman for reliable data synchronization.
- Enhanced UI performance with React Hooks, memoization, lazy loading, and worked closely with designers and backend developers to align UI/UX with business goals.

PROGRAMMING LANGUAGES

JavaScript (ES6+), TypeScript, SQL / NoSQL (PostgreSQL, MongoDB), Python

CORE SKILLS

System design, API design, data modeling, auth & security, performance optimization, caching, testing

FRONTEND SKILLS

React, Next.js, Redux, Zustand, TailwindCSS

BACKEND SKILLS

Node.js, NestJS, Express, Prisma, PostgreSQL, MongoDB, Redis, Docker, CI/CD, AWS, Swagger / OpenAPI

LANGUAGES

English | Persian
