SUMMARY

Full Stack Developer experienced across the entire stack: React/Next.js/TypeScript on the frontend and Node.js (Express.js, NestJS) with PostgreSQL/MongoDB on the backend. Builds secure, well-tested REST/GraphQL APIs and pairs them with fast, accessible, SEO-friendly UIs. Comfortable owning a feature end-to-end - from schema design and API contracts through component implementation, performance tuning, and CI/CD. Uses AI coding tools and LLM APIs to speed up delivery and prototype AI-powered features.

EXPERIENCE

Backend Developer 01/2026 – 05/2026
Hexorix UK

- Built scalable TypeScript backend services using Express.js and NestJS with modular, clean architecture, cutting feature delivery time by 20%.
- Enhanced PostgreSQL/MongoDB performance and data consistency using TypeORM and Mongoose, reducing average query latency by 30%.
- Developed secure REST/GraphQL APIs featuring JWT/RBAC authentication, validation, and Redis caching/rate limiting, supporting 50+ concurrent endpoints.
- Streamlined the CI/CD pipeline by integrating Jest (80%+ test coverage on core modules), Swagger, and Docker.
- Designed modular NestJS services with dependency injection, DTO validation, and centralized error handling to keep codebases maintainable as the team grew.
- Documented APIs with Swagger/OpenAPI so frontend and QA teams could integrate without back-and-forth.
- Containerized services with Docker for consistent local, staging, and production environments.

Full Stack Developer 09/2025 – 12/2025
Sahar SMS Tehran

- Engineered secure REST APIs with Node.js/TypeScript using JWT, RBAC, middleware, and rate limiting for a platform serving thousands of daily SMS transactions, and streamlined PostgreSQL schemas with TypeORM (relations, indexes, migrations), reducing slow-query incidents by 25%.
- Improved backend performance with Redis caching, session storage, and background job queues, cutting average response time by 35%.
- Shipped fast, SEO-friendly Next.js/React applications with SSR, SSG, ISR, on-demand imports, and code-splitting, improving page load times by 25%.
- Delivered responsive, accessible UIs from Figma and created reusable component libraries documented in Storybook, cutting design-to-dev handoff time by 20%.
- Built background job queues for high-volume SMS processing, keeping the API responsive during traffic spikes.
- Wrote reusable middleware for authentication, logging, and request validation across services.
- Collaborated with design and backend on API contracts to keep frontend and backend aligned.

Front End Developer 01/2024 – 06/2025
Apanco Sari, Mazandaran

- Converted UX/UI wireframes into production-ready React, TypeScript, and Next.js applications, reducing post-launch issues by 15%.
- Implemented and integrated scalable RESTful APIs with Express.js and TypeScript, adding secure authentication with JWT and NextAuth.js, supporting 10+ client-facing features.
- Applied Git workflows and CI/CD pipelines, collaborating with backend engineers to improve API contracts and data flow, cutting release cycle time by 15%.
- Enhanced React and Next.js app performance through on-demand imports, image optimization, and lazy loading, improving Lighthouse scores by 20%.
- Built reusable, typed React/TypeScript components shared across client projects.
- Managed server and client state with React Query and Zustand to cut redundant API calls.
- Added i18n support to prepare apps for multi-language users.

Front End Developer 03/2022 – 12/2023
Sepehr Academy Sari, Mazandaran

- Joined as one of 3 developers on an Agile team building Sepehr Academy's e-learning platform, establishing a modular, reusable React component system that cut duplicate code by 25% and sped up new-feature delivery.
- Designed and built a scalable admin dashboard from the ground up using React, Context API, and Material UI, integrating RESTful APIs via React Query, Axios, and Postman to give staff real-time visibility into usage across 500+ daily active users.

- Translated Figma wireframes into pixel-perfect, accessible interfaces using HTML, CSS, Flexbox/Grid, and modern JavaScript, achieving 100% WCAG AA compliance across core pages and reducing user-reported UI issues.
- Took part in sprint planning, code reviews, and pair programming, helping the team standardize component and state-management patterns that carried over into later projects at Apanco and Sahar SMS.
- Handled API integration and error/loading states for the e-learning platform's student and admin flows.
- Reviewed teammates' pull requests and helped standardize Git branching and code-review conventions.

SKILLS

Core Frontend
React, Next.js, TypeScript, JavaScript, HTML, CSS, TailwindCSS

Backend & Databases
Node.js, NestJS, Express.js, REST APIs, GraphQL, JWT/NextAuth.js, PostgreSQL, MongoDB, TypeORM, Mongoose, Redis

State & Data
Context API, Zustand, React Query, Axios

Performance & UX
SSR/SSG/ISR, Code-Splitting, Lazy Loading, Lighthouse, Accessibility (WCAG), i18n

Testing & DevOps
Jest, Docker, CI/CD, Swagger/OpenAPI, Postman

Tooling & Practices
Git, GitHub, Atomic Design, Storybook, Agile/Scrum

AI & Productivity
AI-assisted development (GitHub Copilot, Cursor, Claude Code), LLM API integration (OpenAI, Anthropic), Prompt Engineering

LANGUAGES

- English
- Persian
